

Constructeursregister RC/RO

A reliable partner

Find a Registered Structural Engineer (RC) / Professional Engineer (RO)

Are you searching for the best guarantee for a safe and reliable construction?

Select a RC or RO for your project.

A RC/RO represents the highest standard of engineering excellence. Our RC and RO members have demonstrated proven knowledge and experience and are committed to professional standards and to continuous learning.

To ensure the quality of our RCs and ROs, applicants are tested and validated by an independent trial commission consisting of leading engineering firms in the Netherlands. We reassess our members every three years to ensure their knowledge and skills are up-to-date.

Why do you need a RC or RO?

RCs and ROs are:

- Talented with proven knowledge, technical skills and experience required to deliver a successful project
- Professionally accountable for their work and are committed to professional standards, ensuring high quality output
- Experts in their field and can deliver an optimum design that is safe, reliable and economical

About Constructeurs Register

This register is a part of the “Compendium Aanpak Constructieve Veiligheid” and is supported by several leading organisations in the Dutch building world, including COBc, KIVI NIRIA, NEPROM, NLIingenieurs, Prorail, Rijkswaterstaat, VIB-Bouwend Nederland, VNconstructeurs, Betonvereniging en Bouwen met Staal.

To learn more about how a RC/RO can better benefit your business, please visit our website at www.constructeursregister.nl or contact us at <insert contact info>
